Facts & figures

Meyer & Meyer

since 1902

Our background is as a specialist in fashion logistics. So does that mean we're not quite the right logistics partner for you? Not at all. It means we're exactly the right partner for you. No other industry puts as many demands on logistics providers as fashion: extremely short lead times, the ability to handle delicate and valuable wares, innovative equipment and a whole array of value-added services.

Meyer & Meyer has taken the processes it developed for fashion logistics, and adapted them for a wide variety of other industries. From cutting-edge electronics to antique pianos, fragile and awkward items are in safe hands with us. You will also benefit from the high-frequency connections that we have established for our fashion customers on many national and international routes – so if you need something in Moscow first thing tomorrow, that's no problem.

Aside from our fashion expertise, we also have decades of experience in other areas of logistics. After all, we started trading in 1902 as furniture removers.

**WE GO
FURTHER
THAN**

A  **B**

Meyer & Meyer will get your goods safely to their destination, by land, sea or air. But we also understand that this is only one element of a modern logistics service. We play a key role in integrating manufacturing and distribution operations, and as such, we are vital to the smooth running of our customers' businesses. So with us, irrespective of the final destination, all roads lead to quality at every stage of the journey.

We look after all the administrative tasks related to the transport of goods, and employ specialists in areas such as customs clearance and supplier management to ensure a seamless process that results in the punctual arrival of your goods. In addition, we offer storage, order picking and labelling at our state-of-the-art warehousing facilities, as well as a variety of other value-added services. Logistics consultancy is likewise very much part of what we do, and we will work with you to create solutions that are individually tailored to the requirements of your company and your industry. And when your goods are in transit, you can follow their progress in real time with our Track&Trace system.

Perpetual motion is not just our business, it's also our philosophy. We are constantly striving to improve, by analysing customers' goods flows and optimizing our routings, with the aim of offering you a more efficient service.

OVER
4,000
HELPING HANDS
FOR YOUR
FRAGILE
GOODS

Not everything can be transported in the conventional way. Which is why we're never afraid to come up with unconventional solutions for industries such as electronics and medical technology that have highly specialized requirements. All of our more than 2,000 employees have received special training in the handling of fragile goods, and our vehicle fleet too is up to the challenge, with heavy-duty swap bodies, temperature-controlled trailers and a range of other specialist equipment that meets the highest standards of safety and hygiene.

Complex assignments

DIFFICULT JOBS

ARE THE ONES WE LIKE BEST

Transporting and storing complex products or very large quantities can throw up a lot of questions – but we always find the answers. Companies from across a whole spectrum of industries, from furniture makers to manufacturers of cars and household appliances, all put their trust in our logistics solutions. We are able to handle even the most awkward of logistical challenges, thanks to our specialist equipment such as two-level and extra-large trailers. In fact, there's almost nothing we can't do. So get in touch, and find out how we can help resolve your logistical nightmares.

OSNABRÜCK

TO EGYPT

IN **NEXT TO NO TIME**

As you would expect of a modern logistics provider, we are an international company not just in the scale of our operations, but also in our outlook. Drawing on their in-depth knowledge of the market, our logistics coordinators will think across borders to answer all your questions – when, where, what and how.

To ensure we can offer our customers the most innovative solutions around, we closely monitor the latest trends in the logistics sector. And by working together with carefully chosen strategic partners, we have a presence on the ground in countries that are increasingly important to companies in many industries, both as manufacturing locations and as end markets. To give just a few examples, these countries now include the North African nations of Morocco, Tunisia and Egypt.

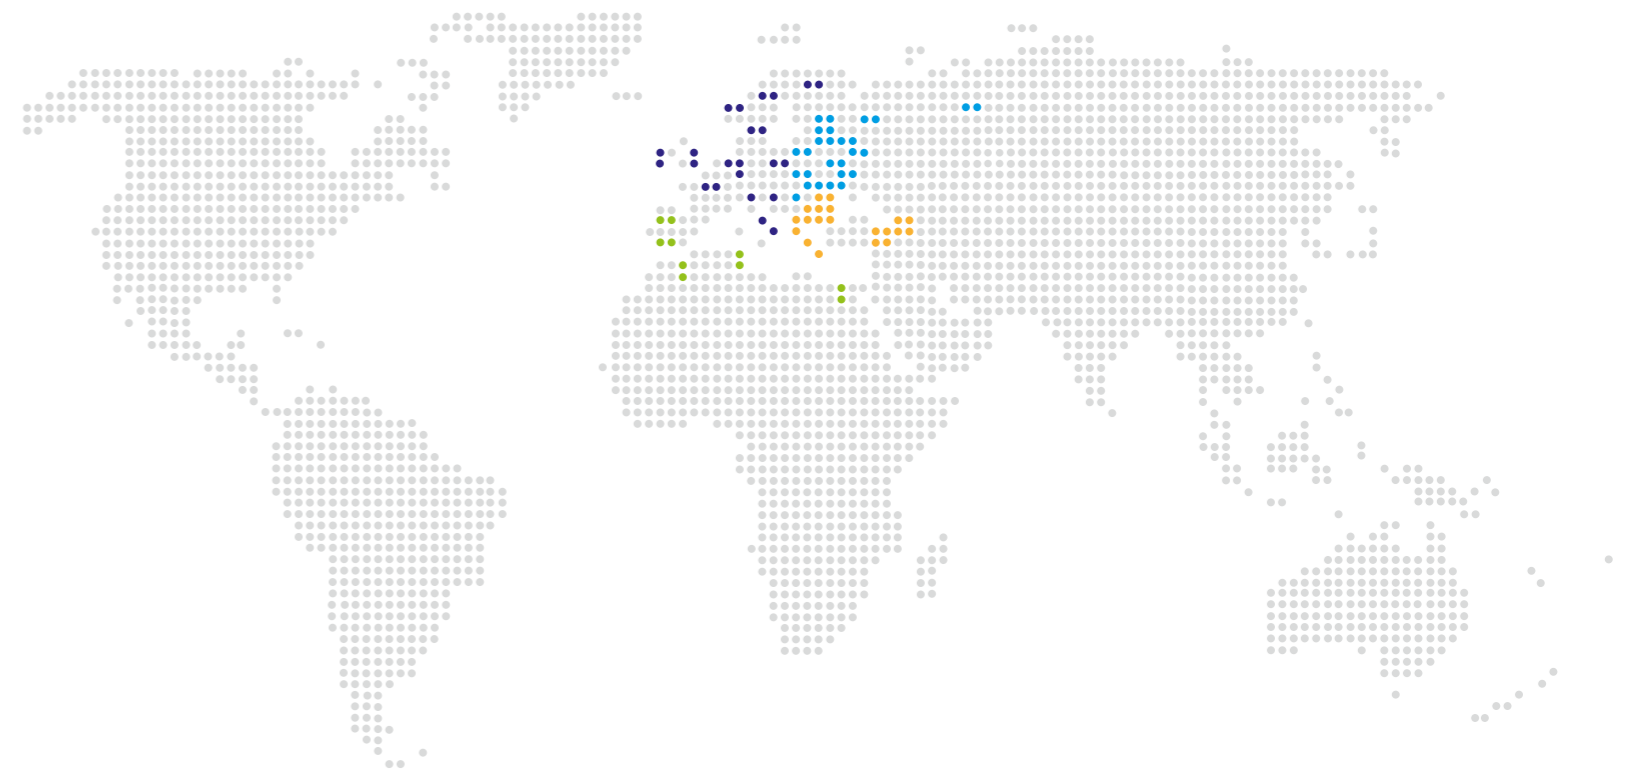

TIMING IS EVERYTHING

We move goods via an extensive logistics network that comprises over 20 locations in Germany and over 60 in other European and North African countries. The large number of different transportation options can be combined in various ways so that they mesh seamlessly with your own processes. For instance, you can decide whether to choose the speed of air freight, the low cost of sea freight, or a combination of the two. Our experts will also be pleased to advise you on customs clearance procedures in different countries.

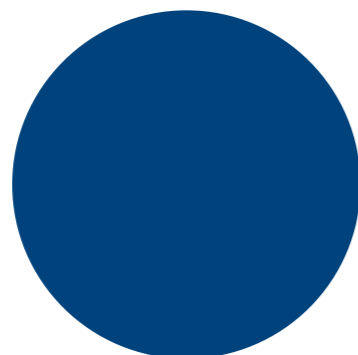

- Albania, Armenia, Bosnia, Bulgaria, Croatia, Greece, Macedonia, Montenegro, Romania, Serbia, Turkey
- Austria, Belgium, Denmark, Finland, France, Germany, Great Britain, Ireland, Italy, Netherlands, Norway, Sweden, Switzerland
- Belarus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Moldova, Poland, Russia, Slovakia, Ukraine
- Egypt, Morocco, Portugal, Spain, Tunisia

LOGISTICS THAT HIT

THE

Innovative solutions tailored to your company's requirements. Special equipment for fragile goods and complex assignments. Efficient, high-quality service. An effective international logistics network. Systematic solutions that encompass the whole supply chain, including logistics consultancy, warehousing, transportation and a variety of value-added services. If that sounds like what you're looking for, then you've come to the right place. Because if you open your mind, you'll see that a fashion logistics provider like us can also be exactly the right logistics provider for you.
